

Project History

New Deck on Historic Home

Year Completed: 2010

Location: Astoria, OR

Architect: Michelle Dieffenbach

Project Size: 185 Sq Ft

This project required the construction of a new deck over the top of an existing carport attached to a designated historic home. The home had been extensively remodeled and restored and the deck needed to blend in with existing style. There was one location that worked with the interior of the house for entrance to the deck which required exterior stairs up to the actual deck over the carport. Hard wood decking with traditional style painted balustrades worked with modern accent lighting to give it a new yet historic feel.
